

## I found a squirrel

Park City Hummingbird Hospital

Park City Hummingbird Hospital www.hummingbirdhospital.org

Does the squirrel have flies around it!?

Place in a box with soft bedding and keep warm. Do not give food or water. Call ourWildlife Hotline (801)228-0831

Move the squirrel to the base of the tree from which it fell for 2 hours if the skin is pink and 2-3 hours if the squirrel is grey but never after dark. If the squirrel is fully furred, allow 4 hours. The squirrel should be in a box on the ground (no depper than 4 inches and without bedding covering) so that it is visibile to the mother squirrel. You can put a water
bottle filled with warm water and wrapped in a tshirt in the box to keep the baby warm. Leave the area. If the squirrel is still under the tree after the prescribed amount of time or if you see signs of predators, flies, or the squirrel becomes cold, bring it inside. Do not feed or give water and call our
Wildlife Hotline (801)228-0831.
